6. Furniture markets.....	30
6.1 Introduction.....	30
6.2 Trade data by product groupings	31
6.3 Trade by country	38

Executive summary

This digest is an essential read for anyone operating in the furniture sector and is a distillation of information that is primarily sourced from the websites of government bodies such as the Office for National Statistics (ONS), HM Revenue and Customs, Communities and Local Government and Bank of England. The available data (covering the period 2018 to 2022 (where data is available), has been analysed and compiled to produce the following series of reports:

1. Consumer spend
2. The structure of the UK furniture manufacturing industry, its size, distribution and number of employees
3. Furniture manufacturers turnover, imports and exports
4. The total size of the furniture industry, including manufacturing, retailing, distribution and repair
5. Trading relationships with the rest of the world and an analysis of trade gaps

All data sources are referenced within the report and are publicly available to organisations wishing to undertake their own statistical analyses.

The industry structure figures cover furniture manufacturing as a whole and, in addition, data is presented for the following sub-sectors:

1. Office and shop furniture
2. Kitchen furniture
3. Mattresses
4. Other furniture

Turnover, import and export data are presented for the above sub-sectors. It has also been possible to analyse each of these sub-sectors in more depth. As such, trade figures are shown for a range of contract, office and domestic product groups.

A brief commentary, largely focussing on medium-term trends and the changes between 2018 to 2022, supports the tabulated and graphical data and includes highlights such as:

The UK furniture and furnishings sector

- The UK furniture and furnishings sector, comprising design, manufacturing, retail and repair is much larger than many people think.
- Total manufacturing turnover for this sector in 2022 was £11.35 billion, representing a year-on-year increase of 9.2%.
- This turnover emanated from 6,880 companies employing 91,000 individuals.

- The wider sector, including specialist retail but excluding general retail, comprised over 29,932 VAT registered companies supporting in the order of 292,000 jobs, with a combined turnover of £41 billion.

Consumer spend

- Total UK consumer expenditure increased between 2021 and 2022 to £1,352 billion (an increase of 5%, following a decrease in 2020 of 13%).
- Despite this increase in total spending, expenditure for the wider furnishings, household goods and routine maintenance sector fell by 5%.
- Consumer expenditure on furniture & furnishings was just over £20.1 billion in 2022.

Furniture industry trends

- Total manufacturing turnover in 2022 was £11.35 billion, which was 10% higher than 2021.
- In 2021, 6,857 UK furniture manufacturers employed a total of 90,000 individuals.
- Office and shop furniture saw turnover increase to £2.37 billion in 2022.
- Turnover in the “kitchen” sector showed an increase in 2022 to £3.84 billion.
- The “mattress” sub-sector grew slightly to £0.9 billion in 2022.
- The rest of furniture manufacturing comes under the heading of “other furniture” and comprises the largest of the industry’s four sub-sectors. 2022 turnover was £4.64 billion, an increase on the 2021 figure of 16%.
- “Other furniture” has a significant influence on UK furniture manufacturing’s overall performance figures, accounting for 31% of turnover. As such, any recovery in turnover here normally reflects the overall position of the whole furniture sector.
- Furniture manufacturing continues to be dominated by micro and small to medium size businesses with just 305 companies (5%) operating at turnovers in excess of £5 million.
- 150 companies turn over more than £10 million, which is slightly higher than the previous year.
- The latest data indicates 6,880 companies in the sector. Most of this growth has been in the number of companies turning over less than £1 million, although there has been a slight increase in the number of organisations in the £1 million to £5 million bracket as well as the £5 million to £10 million and £10 million to £50 million brackets. This, particularly in the higher turnover brackets, is assumed to be due to growth rather than new entrants.

- 83% of companies turnover less than £1 million and the largest percentage of companies are in the £100,000 to £250,000 turnover band. This is largely unchanged from the previous year.
- There remains a significant proportion of extremely small companies within the whole furniture manufacturing sector with 58.2% of organisations operating at turnovers of less than £250,000.
- In the “mattress” and “office and shop” sectors the percentage of smaller companies is lower than for the other sectors (61.9% and 66.5% within these sectors turnover less than £1 million respectively). Conversely, in the “other furniture” and “kitchen” sectors turnover is significantly higher at 87.1% and 85.8% respectively.
- The “mattress” sector has proportionately more large companies than other sectors, with 16.7% of companies turning over more than £5 million, an increase of 33% from 2016. In comparison, 9.8% of companies within the “office and shop” sector turnover more than £5 million, followed by “kitchen” (3.6%) and “other furniture” (3.1%).

International trade

- Imports of furniture into the UK in 2022 increased to £8.5 billion.
- As in previous years, by far the biggest value of imports originated from China (£3.2 billion), with its share of imports into the UK increasing slightly to 38%.
- In purely financial terms Poland ranked second in the hierarchy of furniture exporters to the UK. Germany moved to third position with Italy dropping to fourth. In round terms, these countries accounted for 10%, 9.5% and 9% of furniture imports into the UK respectively at around half a billion pounds each.
- Furniture exports have continued to grow in recent years reaching £1.4 billion in 2022.
- Exports to the Irish Republic continue to grow year on year and reached £0.29 billion in 2020, an increase of 16.2% from 2019.
- There was an increase in UK furniture exports to the USA in 2022 (£252 million) which accounted for 12.3% of the total. And the USA overtook Ireland as the largest export market for the first time.
- The 2022 negative trade gap with China (the largest for the sector) was £3.1 billion. There were also large negative trade gaps with Poland, Italy and Germany.
- The main positive trade gap, as in previous years, was with the Irish Republic. This gap, despite the Republic's recent increases in exports to the UK, moved from £0.19 billion to £0.13 billion in 2022.

1. Introduction

This Statistics Digest is the Research Association's compilation of published statistics and market information which has been sourced primarily from the Office for National Statistics (ONS), HM Revenue and Customs, Bank of England and the Communities and Local Government websites. It comprises both national economic factors of a general nature (these will have a direct influence on the market demand for furniture) and data specific to the furniture manufacturing industry and its different sectors.

The digest incorporates the latest available statistical information, relating to 2019 and 2023 where available, and for certain criteria, also presents "time series data".

A full list of analyses is summarised on the "Contents" page.

It is important to recognise that all statistics should be treated with caution and are only as good as the raw data from which they are compiled.

Every attempt has been made to utilise standard core sets of data and to adopt a consistent approach. However, data inconsistencies do occur from time to time, and, under these circumstances, the best available figures have been employed.

2. Furniture source data

The data and information contained within this digest relate to most furniture items that would normally be found in the home (domestic), office and contract sectors of the UK furniture market.

The majority of furniture statistics are sourced from time series data available online through the Office of National Statistics and by using industry SIC (Standard Industrial Classification of Economic Activities) and CN (Combined Nomenclature) codes.

Specific sources of information for each of the analyses within the report are referenced below the tabulated data. This enables the source data to be readily accessed should individuals, or organisations, wish to carry out more in-depth analyses for themselves.

Traditionally, it has been preferable to differentiate between office, domestic (home) and contract furniture. However, in many cases, these sectors overlap within the classification codes. Every attempt has been made to differentiate between office and domestic sectors, but contract data are inevitably masked within these two sub-sectors.

In addition, some “non-furniture” items tend to be included within national statistics for furniture and equally, items that might readily be described as furniture are often omitted or included within the SIC codes for another industry sector.

3. Standard Industrial Classification (SIC)

3.1 Introduction

The United Kingdom Standard Industrial Classification of Economic Activities (SIC) is used to classify business establishments and other standard units by the type of economic activity in which they are engaged. It provides a framework for the collection, tabulation, presentation and analysis of data.

UK manufacturing information within this report is compiled using the SIC (07) classification system, which facilitates consistency when comparing statistical data (note that pre-2008 data was compiled using a different set of SIC codes, thus making time series comparisons with such data unreliable).

World trade figures are compiled using the Combined Nomenclature Classification system (CN numbers) as defined within the Official Journal of the European Union, L312. The Combined Nomenclature classification system is slightly different from the SIC (07) system. However, the two systems do cross reference thus facilitating valid comparisons between UK manufacturing, imports and exports.

Full details of the two classification codes, and their comparability, are presented in the subsequent section of this report.

3.2 SIC and CN code systems

3100 Manufacture of furniture

This division includes the manufacture of furniture and related products of any material except stone, concrete and ceramic. The processes used in the manufacture of furniture are standard methods of forming materials and assembling components, including cutting, moulding and laminating. The design of the article, for both aesthetic and functional qualities, is an important aspect of the production process. The division is subdivided into the following categories and sub-categories:

3101 Manufacture of office and shop furniture

- 31001150 (CN 94013000) - Swivel seats with variable height adjustments EXCLUDING: - medical, surgical, dental or veterinary seats – barbers' or similar chairs
- 31001190 (CN 940179) - Non-upholstered seats with metal frames EXCLUDING: - medical, surgical, dental or veterinary seats - barbers' or similar chairs - swivel seats
- 31011100 (CN 94031051 + 94031058 + 94031091 + 94031093 + 94031098) - Metal furniture for offices INCLUDING: - tables and desks - cupboards and cabinets - display units and bookcases EXCLUDING: - seats - armoured or reinforced safes

- 31011200 (CN 940330) - Wooden furniture of a type used in offices INCLUDING: - fixed pedestals, moveable pedestals - desks and tables - cupboards, cabinets and bookcases - shelves, racking, screens and panels EXCLUDING: - seats
- 31011300 (CN 94036030) - Wooden furniture for shops EXCLUDING: - seats

This class excludes blackboards; car seats; railway car seats; aircraft seats; medical, surgical, dental or veterinary furniture; modular furniture attachments and installation; partition installation; laboratory equipment furniture installation.

3102 Manufacture of kitchen furniture

- 31001290 (CN 940169) - Non-upholstered seats with wooden frames EXCLUDING: - swivel seats
- 31021000 (CN 94034) - Wooden kitchen furniture INCLUDING: - wooden units for fitted kitchens EXCLUDING: - seats

3103 Manufacture of mattresses

- 31031100 (CN 940410) - Mattress supports INCLUDING: - wooden or metal frames fitted with springs or steel wire mesh - upholstered mattress bases - with wooden slats - divans
- 31031230 (CN 94042110) - Mattresses of cellular rubber INCLUDING: - with a metal frame EXCLUDING: - water-mattresses - pneumatic mattresses
- 31031250 (CN 94042190) - Mattresses of cellular plastics INCLUDING: - with a metal frame EXCLUDING: - water-mattresses - pneumatic mattresses
- 31031270 (CN 94042910) - Mattresses with spring interiors EXCLUDING: - of cellular rubber or plastics
- 31031290 (CN 94042990) - Mattresses EXCLUDING: - with spring interiors - of cellular rubber or plastics

This class excludes inflatable rubber mattresses and rubber waterbed mattresses.

3109 Manufacture of other furniture

- 31001170 (CN 940171) - Upholstered seats with metal frames EXCLUDING: - swivel seats - medical, surgical, dental or veterinary seats - barbers' or similar chairs - for motor vehicles - for aircraft
- 31001210 (CN 940140) - Seats convertible into beds EXCLUDING: - garden seats or camping equipment
- 31001230 (CN 94015) - Seats of cane, osier, bamboo or similar materials

- 31001250 (CN 940161) - Upholstered seats with wooden frames INCLUDING: - three-piece suites EXCLUDING: - swivel seats
- 31001300 (CN 940180) - Other seats INCLUDING: - plastic garden seats, camping seats EXCLUDING: - for aircraft - for motor vehicles - swivel seats - seats convertible into beds - seats of cane, osier, bamboo or similar - seats with wooden or metal frames - medical, surgical, dental/veterinary seats - barbers' or similar chairs
- 31001400 (CN 94019030 + 94019080) - Parts for seats EXCLUDING: - for medical, surgical dental or veterinary seats - for barbers' and similar chairs - of a kind used for aircraft
- 31002030 (CN 94039010) - Parts of metal furniture EXCLUDING: - for seats - medical, surgical, dental or veterinary furniture - for SPECIALLY DESIGNED furniture for hi-fi systems, videos or televisions
- 31002050 (CN 94039030) - Parts of wooden furniture EXCLUDING: - for medical, surgical, dental or veterinary furniture - for seats
- 31002090 (CN 94039090) - Parts of furniture other than of wood or metal EXCLUDING: - for seats - for medical, surgical, dental or veterinary furniture
- 31091100 (CN 940320) - Metal furniture for domestic use and for banks, bars, churches, cinemas, hotels, laboratories, libraries, museums, pubs, restaurants, schools, shops, workshops EXCLUDING: - medical, surgical, dental or veterinary furniture - seats
- 31091230 (CN 940350) - Wooden furniture for the bedroom INCLUDING: - headboards EXCLUDING: - builders' fittings for cupboards to be built into walls - mattress supports - lamps and lighting fittings - floor standing mirrors - seats
- 31091250 (CN 94036010) - Wooden furniture for the dining-room and living-room EXCLUDING: - floor standing mirrors - seats
- 31091300 (CN 94036090) - Wooden furniture for domestic use and for banks, bars, churches, cinemas, hotels, laboratories, libraries, museums, pubs, restaurants, schools, workshops EXCLUDING: - shop, medical, surgical, dental or veterinary furniture - for bedroom, dining-room, living-room or kitchen - seats
- 31091430 (CN 940370) - Plastic furniture INCLUDING: - headboards EXCLUDING: - medical, surgical, dental or veterinary furniture - seats
- 31091450 (CN 94038) - Furniture of materials other than metal, wood or plastic INCLUDING: - headboards EXCLUDING: - seats

4. National economic factors

4.1 Household final consumption expenditure summary

Series name	Series code	£millions				
		2018	2019	2020	2021	2022
Food and non-alcoholic beverages	ADIP	108,685	110,325	119,208	120,662	112,384

Note 1: Chained volume measures (CVM), not seasonally adjusted, £ millions.

5. Structure of the UK furniture manufacturing industry

5.1 The size of the UK furniture industry

Manufacture of Furniture		2018	2019	2020	2021
Number of enterprises	Number	6,378	6,355	6,504	6,857
Total turnover	£ million	8,861	8,994	8,054	9,321
Approximate gross value added at basic prices	£ million	3,730	3,714	3,406	3,899
Total purchases of goods, materials and services	£ million	5,153	5,317	4,900	5,586
Total employment - point in time	Thousand	92	92	91	90
Total employment costs	£ million	2,176	2,267	2,168	2,382

Source: Office for National Statistics, Annual Business Survey Reports. Section C. Manufacturing May 2023

Note 1: Total employment - point in time, and Total employment - average during the year, are from the Business Register and Employment Survey (BRES). Caution is advised when combining financial data from the ABS with employment data from BRES due to differences in methodology.

The Annual Business Survey further segregates furniture manufacturing into the following sub-sectors:

- 3101 Manufacture of office and shop furniture
- 3102 Manufacture of kitchen furniture
- 3103 Manufacture of mattresses
- 3109 Manufacture of other furniture

Data for these sub-sectors are in the subsequent tables:

SIC Code and category	Units	2018	2019	2020	2021
3101 Manufacture of office and shop furniture					
Number of enterprises	Number	900	895	876	882
Total turnover	£ million	2,173	2,201	1,793	2,064
Approximate gross value added at basic prices	£ million	955	936	756	868
Total purchases of goods, materials and services	£ million	1,226	1,276	1,074	1,234
Total employment - point in time	Thousand	20	21	20	17
Total employment costs	£ million	561	572	512	473

SIC Code and category	Units	2018	2019	2020	2021
3102 Manufacture of kitchen furniture					
Number of enterprises	Number	1,413	1,445	1,490	1,592
Total turnover	£ million	2,427	2,692	2,578	2,968
Approximate gross value added at basic prices	£ million	945	1,029	1,058	1,236
Total purchases of goods, materials and services	£ million	1,476	1,679	1,581	1,760
Total employment - point in time	Thousand	22	22	22	23
Total employment costs	£ million	536	614	644	805

Total employment - point in time	Thousand	42	41	41	41
Total employment costs	£ million	888	879	834	906

5.2 Manufacture by product groupings

5.2.1 Introduction

The broad sub-sector groupings within the previous section can be broken down further into different product groupings using the PRODCOM 31 report issued by ONS. It is important to recognise that there are differences between UK production data collated for the Annual Business Survey (Section 5.1) and those collated for the PRODCOM reports referenced in this section. This is attributable to a number of factors such as:

- PRODCOM focuses on products and the Annual Business Survey (ABS) on activities.
- Samples of companies contributing to data differ between the Annual Business Survey and Prodcum.
- Report timing (ABS uses financial year end data and PRODCOM uses calendar year end data).
- Inclusion or exclusion of income derived from non-manufacturing activities within PRODCOM.

A full explanation of the relevant criteria is accessible via the [ONS website](#).

5.2.2 Manufacture of furniture

Product Description	2018	2019	2020	2021	2022
Division 3101 Office and shop	£ billions	£ billions	£ billions	£ billions	£ billions
Manufacture of furniture and other sales	1.14	1.26	0.95	1.10	1.24
Other income	0.99	0.93	0.96	0.88	0.73

Manufacture of furniture and other sales	7.14	7.35	6.43	7.86	7.73
Other income	2.52	3.38	2.72	2.53	3.62
TOTAL	9.66	10.73	9.15	10.39	11.35

Source: Office for National Statistics (ONS) PRODCOM 31. Dec 2022. Slight discrepancies in totals are due to rounding errors. Release date 24th July 2023.

"Manufacture of furniture and other sales" equates to total UK manufacturer sales of products in this group including other manufacturer sales.

"Other income" comprises merchanted goods, work done, waste products, non-production income such as services, net carry in / carry out.

S = estimate due to suppressed data.

5.2.3 Office and shop – Division 3101

Product Description	2018	2019	2020	2021	2022
Office and shop	£000s	£000s	£000s	£000s	£000s
Total turnover of businesses attributable to this sector including:	2,082,057	2,072,947	2,130,699	2,154,401	1,712,481

Notes for tables in Section 5.2

S = Suppressed, or partially suppressed as disclosive in the source tables.

Some totals differ from the sum of the individual parts due to rounding and/or the impact of suppressed data.

5.3 The wider furniture and furnishings sector

A number of the industry's trade associations have a broader remit than furniture manufacturing, particularly in relation to soft furnishings, carpets and repair/refurbishment. **2022** data for the wider furniture and furnishings sector are also available within the ABS report and are presented below.

SIC Code and Category	Number of enterprises	Total turnover	Total employment average during the year
		£millions	Thousands
2022			
1392 - Manufacture of made-up textile articles, except apparel	2,172	2,731	23
1393 - Manufacture of carpets and rugs	100	1,046	4
3100 - Manufacture of furniture	6,857	9,321	91
4615 - Agents involved in the sale of furniture, household goods, hardware and ironmongery	1,293	772	2
4647 - Wholesale of furniture, carpets and lighting equipment	2,439	5,452	16
4665 - Wholesale of office furniture	429	903	3
4753 - Retail sale of carpets, rugs, wall and floor coverings in specialised stores	4,093	2,955	26
4759 - Retail sale of furniture, lighting equipment and other household articles in specialised stores	10,243	15,550	112
7729 - Renting and leasing of other personal and household goods	1,422	1,187	11
95.24 - Repair of furniture and home furnishings	884	220	4

Summary	Number of enterprises	Total turnover	Total employment average during the year
		£millions	Thousands
Manufacturing	9,129	13,098	118
Wholesale and agencies	4,161	7,127	21
Retail	14,336	18,505	138
Leasing	1,422	1,187	11
Repair	884	220	4
Total	29,932	40,137	292

5.4 Breakdown of the UK furniture industry by turnover, number of employees and by region

5.4.1 Data sources

The total numbers of companies and employees within this section are slightly different from those reported in Section 5.1. This is because data have been collated from a different source (UK Business Activity, Size and Location). In addition, the data is the latest figures available as published in September 2023. However, it remains important to use data from this source so that a breakdown of the comparative sizes and locations of businesses within the furniture sector can be reported.

When analysing these data sets it is important to recognise that the lowest common denominator appears to be 5, which will impact on the significance of results from some of the categories that display lower totals and may also mean that some "totals" in one table differ slightly from "totals" in other tables.

5.4.2 Number of furniture manufacturers by turnover band

The industry is dominated by micro and small to medium-sized businesses with just 305 companies (5%) operating at turnovers in excess of £5 million (an increase of 5% when compared to the previous year). 160 companies turnover more than £10 million which is slightly higher than the previous year.

The latest data indicates 6,880 companies in the sector, a slight increase from last year. Most of this growth has been in the number of companies turning over less than £1 million, although there has been a slight increase in the number of organisations in the £1 million to £5 million bracket as well as the £5 million to £10 million and £10 million to £50 million brackets. This, particularly in the higher turnover brackets, is assumed to be due to growth rather than new entrants.

83% of companies turnover less than £1 million and the largest percentage of companies are in the £100,000 to £250,000 turnover band (31.4%). These figures are largely unchanged from previous years.

In the "mattress" and "office and shop" sectors the percentage of smaller companies is lower than for the other sectors (61.9% and 66.5% within these sectors turnover less than £1 million respectively). Conversely, in the "other furniture" and "kitchen" sectors it is significantly higher at 87.1% and 85.8% respectively.

The "mattress" sector has proportionately more large companies than the others with 16.7% of companies turning over more than £5 million. In comparison, 10.4% of companies within the "office and shop" sector turnover more than £5 million, followed by "kitchen" (3.6%) and "other furniture" (3.1%) sectors.

There remains a significant proportion of extremely small companies within the whole furniture manufacturing sector with 56% of organisations operating at turnovers of less than £250,000.

March 2023	Turnover size band (£ thousands)										Total
	0 to 49	50 to 99	100 to 249	250 to 499	500 to 999	1,000 to 1,999	2,000 to 4,999	5,000 to 9,999	10,000 to 49,999	50,000 +	
3101 Office and shop furniture	85	80	200	115	115	90	100	45	40	5	875
3102 Kitchen furniture	85	245	475	300	220	140	80	25	20	5	1,595
3103 Mattresses	15	35	55	25	25	25	35	15	20	0	250
3109 Other furniture	350	855	1,370	610	405	255	185	60	65	5	4,160
Total number of companies	535	1,215	2,100	1,050	765	510	400	145	145	15	6,880

Source: ONS. UK Business Activity, Size and Location. September 2023. Table 9

5.4.3 Number of furniture manufacturers by employment size band

The turnover pattern is to an extent reflected in the employment figures with 79.5% of companies employing less than ten people and only 130 companies (2.0%) employing more than 100.

As expected, this trend is different in the “mattress” sector, with 54.8% of mattress manufacturers employing less than 10 people, whilst 9.5% employing more than 100.

The “office and shop” sector, whilst similar to the other non-mattress sectors at the higher levels of employment, also has fewer companies employing less than 10 people (66.5%), compared with the remaining sectors.

	Employment size band (numbers)							Total
	0 to 4	5 to 9	10 to 19	20 to 49	50 to 99	100 to 249	250 +	
3101 Office and shop furniture	460	140	100	105	45	20	5	875
3102 Kitchen furniture	1,030	285	160	70	25	15	10	1,595
3103 Mattresses	110	35	30	35	20	15	5	250
3109 Other furniture	2,810	660	345	220	75	40	10	4,160
Total number of companies	4,410	1,120	635	430	165	90	30	6,880

Source: ONS. UK Business Activity, Size and Location. September 2023. Table 4

5.4.4 Regional distribution of furniture manufacturers

The subsequent table illustrates that furniture manufacturing companies are generally evenly spread around the United Kingdom with no single, significant geographical hub. However, there are some notable exceptions to this broad conclusion.

The North East, Scotland and Wales have significantly fewer furniture manufacturers than other regions (2.7%, 4.0% and 2.8% respectively). Although Wales and the North East have remained quite static in the number of businesses, this has increased for Scotland and the North West. Northern Ireland has seen a slight decrease and accounts for 5.2% of all furniture manufacturers.

The South East has proportionately more companies than any other region (13.4%) and, combined with London, accounts for 24.2% of all UK furniture manufacturers.

38.7% of "office and shop" furniture manufacturers are in London, the South East and the East.

"Mattress" manufacturing is more regionalised than other sub-sectors with 59.5% based in Yorkshire and The Humber, an increase year on year. Conversely, none are recorded in the adjacent North East region or Wales.

Northern Ireland has slightly more "kitchen" manufacturers than most other regions (12.3%), a figure which is closely matched by the South East.

Wales, Scotland and Northern Ireland comprise lower numbers of "other furniture manufacturers", accounting for 10.6% collectively. However, in general, and except for the North East (2.7%) there is a relatively even geographical spread throughout England.

Government office region	Number of companies				Total
	3101 Office and shop	3102 Kitchen	3103 Mattresses	3109 Other	
North East	14	45	0	120	179
North West	95	175	25	445	740
Yorkshire and Humber	95	140	155	480	870
East Midlands	90	145	10	360	605
West Midlands	85	130	15	385	615
East	130	150	5	430	715
London	105	170	10	495	780
South East	115	185	10	585	895
South West	65	170	10	425	670
Wales	20	35	0	130	185
Scotland	35	55	5	175	270
Northern Ireland	25	195	5	130	355
Total number of companies	874	1,595	250	4,160	6,879

6. Furniture markets

6.1 Introduction

World trade figures used to be sourced from the ONS but, due to coherence issues associated with the data, they are now extracted from HM Revenue and Customs records (www.uktradeinfo.com). They categorise data product groups using the Combined Nomenclature Classification system as defined within the Official Journal of the European Union, L312.

UK production figures are still sourced via the ONS PRODCOM report. They categorise data using both the SIC Code System and the aforementioned CN classification system.

As such, data from both sources can be cross-referenced (although small errors may accrue due to the coherence issues referred to at the start of this Section) thus enabling estimates of the UK home market to be calculated.

The two coding systems are summarised in Section 3.2 of this report.

It is also important to reinforce (as detailed in Section 5.2.1) that there are differences between UK production data collated for the Annual Business Survey (Section 5.1) and those collated for the production information within this section. Whilst both the Annual Business Survey and PRODCOM collate total turnover, there are distinct differences between the two in that PRODCOM focuses on products and ABS focuses on activities. The total value of production for business in an industry group (PRODCOM) may be different from the turnover reported by ABS for the same industry group as enterprises may carry out other activities, besides production, which contribute to turnover.

6.2 Trade data by product groupings

6.2.1 Manufacture of furniture (2022) – Division 31

Product Description	Sales	Exports	Imports	Trade gap	Home market	Imports as a % of home market
	£billions	£billions	£billions	£billions	£billions	%
UK manufacturer sales of products in this group	6.530	1.323	6.334	-5.011	11,541	55.80%
All other income including: other income as part of manufacturer product sales and other income comprising merchanted goods, work done, waste products, non-production income such as services, net carry in / carry out	2.090	N/A	N/A	N/A	2.09	
Total turnover attributable to this sector	8.620	1.323	6.334	-5,011	13.631	46%

The following tables summarise manufacturing product sales for product groupings plus associated UK trade data (imports and exports).

6.2.2 Office and shop (2022) – Division 3101

Product Description	Sales	Exports	Imports	Trade gap	Home market	Imports as a % of home market
	£000s	£000s	£000s	£000s	£000s	%
Office and shop - Total UK manufacturer sales of individual products listed in this group	1,712,481	268,015	732,020	(464,005)	2,176,486	34%

Notes for tables 6.2.1 to 6.2.5

N/A = Data not applicable

S = Suppressed, or partially suppressed as disclosive in the source tables.

Some totals differ from the sum of the individual parts due to rounding and/or the impact of suppressed data.

Note: Data excludes estimates and below-threshold figures as per previous Statistics Digests.

6.3 Trade by country

6.3.1 Introduction

Data comprises the top importing and exporting countries to and from the UK.

Global regions and other individual country breakdowns are available by interrogation of the uktradeinfo website (www.uktradeinfo.com).

6.3.2 Imports

Imports of furniture into the UK in 2022 were £8.52 billion.

The majority of imports originated from China (£3.17 billion), with its share of imports into the UK remaining at 37%.

Italy, Poland and Germany remain the next highest exporters to the UK. In round terms, these countries accounted for a combined 24% of furniture imports into the UK respectively at around £5.5 billion each.

6.3.3 Exports

Furniture exports have continued to grow in recent years and reached £1.46 billion in 2022.

Exports to the Irish Republic continue to grow year on year and reached £0.23 billion in 2022 and the Republic accounts for 17% of all exports, a figure that has remained relatively stable in recent years.

There was an increase in UK furniture exports to the USA in 2022 (£0.25 billion) which accounted for 20% of total exports and overtook Ireland to become the largest market for exports.

6.3.4 Trade gaps and trends

Total furniture imports into the UK have increased year on year, with the figure for 2022 being £8.5 billion.

China remains by far the largest importer of furniture into the UK. In 2022 imports from China totaled £3.17 billion which represents 37% of all imports.

6.3.5 Tabulated UK furniture trade figures for 2022

Country	Exports (£millions)	Imports (£ millions)	Trade gap (£millions)
Irish Republic	230,981	103,038	127,943
Brazil	4,089	49,164	(45,075)
India	6,914	99,562	(92,648)
United States	252,032	145,857	106,175
Vietnam	0.670	367,396	(367,395)
Spain	24,203	103,644	(79,441)
Portugal	5,811	70,912	(65,101)
